Summary

Pre-final year CSE undergraduate at SJCE (CGPA 9.40/10) with hands-on experience architecting end-to-end AI systems and scalable full-stack applications. Shipped a clinical AI platform processing 26,684 chest X-rays in a 24-hour hackathon (Top 10/100+ teams nationally) and built a hyperlocal smart irrigation system ranked Top 5 out of 150+ teams. Focused on data structures, system design, and writing software that creates measurable impact.

Skills

Languages	Python • JavaScript • C • C++ • HTML/CSS
Frameworks	React.js • Next.js • Nest.js • FastAPI • PyTorch
Backend & DB	PostgreSQL • Prisma • SQLAlchemy • REST APIs
Data & ML	NumPy • Pandas • Scikit-learn • Matplotlib • Seaborn • Jupyter Notebook
DevOps & Tools	Docker • Docker Compose • Git • GitHub • Vercel • Render • VS Code
Concepts	Data Structures & Algorithms • Software Design • Asynchronous Systems

Experience

SpareLab Technologies Pvt. Ltd. | *Backend Developer Intern* Jul 2026 – Present
Bengaluru, Karnataka

- Developed backend services for an automotive spare-parts marketplace using **Nest.js, Prisma and PostgreSQL**, implementing modular APIs and database schemas for core marketplace workflows.
- Implemented authentication flows including **Google SSO** and prepared the backend contract for **Apple SSO**, supporting secure user onboarding and login.
- Contributed to a registry-driven **storefront page builder**, implementing configurable Hero Banner, Image Banner, Text Block and Categories components with reorder, duplicate, visibility and deletion functionality.

Novus Webspace Technologies | *Full Stack Developer Intern* Aug 2025 – Sept 2025
Mysuru, Karnataka

- Redesigned **4 core web pages** (Home, About, Testimonials, Events) in Next.js, modernizing the UI across all primary user-facing surfaces of the platform.
- Extended **2 Strapi CMS data models** (Team and Advisors) to support structured personal profiles and LinkedIn integration, enabling dynamic content management without code-level changes for non-technical stakeholders.

Projects

AlveolaAI — Clinical Pneumonia Detection System [🌐 GitHub](#) | [🌐 Live](#) Mar 2026
Tech: React • FastAPI • PyTorch • U-Net++ • Docker • Google Gemini AI

- Architected a U-Net++ pneumonia detection model trained on **26,684 RSNA chest X-rays**, achieving **93.4% classification accuracy** with pixel-level opacity segmentation and Grad-CAM explainability for clinical interpretability.
- Engineered a React + FastAPI web application with a DICOM preprocessing pipeline and dual-head segmentation-classification architecture, delivering per-image inference in **1–3 seconds** with automated PDF report generation.
- Dockerized the full application — frontend and AI backend packaged as reproducible containerized services — and deployed end-to-end project as a 4-member team, placing **Top 10 out of 100+ teams** nationally.

Agrinex — Smart Irrigation Analytics Platform [🌐 GitHub](#) | [🌐 Live](#) Dec 2025
Tech: React • FastAPI • Python • Docker • Docker Compose • Open-Meteo API

- Designed a full-stack React + FastAPI smart irrigation platform with a scalable multi-farm data ingestion pipeline serving real-time soil and weather data to a live React dashboard.
- Engineered a hyperlocal micro-weather forecasting module aggregating atmospheric conditions across **2 km, 5 km and 10 km radii** to generate precision irrigation recommendations via data-driven scheduling logic.
- Containerized frontend and backend as separate Docker services with inter-service networking via Docker Compose; deployed both services independently on Vercel and Render, ranking **Top 5 out of 150+ teams** at a competitive hackathon.

IMDb Kannada Movies — Exploratory Data Analysis [🌐 GitHub](#) Jul 2025
Tech: Python • BeautifulSoup • Pandas • Matplotlib • Seaborn

- Scraped, cleaned and structured a **500–1,000-entry Kannada movie dataset** from IMDb, resolving inconsistencies across ratings, genres and release metadata to produce an analysis-ready corpus.
- Surfaced **7+ actionable insights** into genre distribution, rating trajectories and yearly production trends through

systematic EDA, delivered as a full visual report using Matplotlib and Seaborn.

Leadership & Activities

IEEE-SJCE | Web Development Board Chief

Mysuru

Sept 2025 – Present

- Lead web development initiatives for IEEE-SJCE, contributing to the development, maintenance and evolution of the club’s React-based web platform serving 55+ active members.

Developer Student Club (DSC-JSSSTU) | Web Developer

Mysuru

Oct 2025 – Present

- Contribute to web development initiatives and technical projects, collaborating with student developers to build and maintain club platforms and event infrastructure.

Education

Sri Jayachamarajendra College of Engineering

Bachelor of Engineering in Computer Science & Engineering

2024 – 2028

CGPA: 9.40 / 10

Hari Vidyalaya

2nd PUC (Class XII)

2022 – 2024

98%

Certifications

- Foundation in Data Science and Programming2024
- Machine Learning for Data Science Projects2024
